Fream Blames "Greater Production" Cry for Southern Alberta Condition

**Drought Area Commissioner
Confident of Ability of Farmers
to Get On Feet**

E. J. Fream, commissioner of the Southern Alberta Drought Area Relief Act, in an interview in Calgary, expressed strong faith in the ability of the farmers to come back and pay back 100 cents on the dollar providing they were given an opportunity to recuperate from financial slump brought on, as he sees it, by the "greater production" cry raised in 1917. "All we need at the present time is the confidence of all parties in Southern Alberta and with this we have nothing to fear for the future," said Mr. Fream.

In the interview Mr. Fream cited the case of one of the farmers from the drought area who had just called upon him. "If that man was in any other business, he said, 'he would be considered a hopeless bankrupt. What he is trying to do is to get hold of some livestock that he can feed on shares, or at so much per head, in order that he might utilize a lot of surplus feed that he has. He simply wants to do that to get on his feet again."

Situation Sized Up

"My sizing up of the situation is this," continued the commissioner, "Southern Alberta, in particular is suffering from over-expansion, which started in 1917 and reached its climax in 1918. That was caused principally by the big cry of greater production. Farmers interpreted that cry to mean a larger acreage. Farmers increased their holdings very considerably by taking up all available capital and going heavily into debt. In addition to that financial institutions advanced large sums to many throughout the whole country during that period, most of it being used for this 'greater production' campaign. Some in addition advanced large sums for the purchase of livestock, again using the 'greater production' cry as the necessity for it."

Misjudged Position

"Other interests," said Mr. Fream, "made advances for equipment on time. The general thought seemed to be that the day of 82 wheat was here to stay. No doubt if farmers could have continued to have harvested 1915 and 1916 crops there would have been a bonanza for everybody."

Instead of that the result is that 1918 was followed by probably one of the worst years in the experience of Alberta and the amount of grain marketed in 1919 was very small in Southern Alberta. Conditions remained bad in 1920 and in 1921, partly through poor crops and crop failures aggravated further by a reduction in prices of everything the farmer had to sell."

And 1922 is here," continued the commissioner, "with all farm products down to pre-war prices, and with equipment, labor and practically everything the farmer requires for the production of his crop at prices still considerably above pre-war conditions. Many men who secured advances to purchase livestock have found themselves in the position that in order to pay off these advances when demanded by creditors, they were compelled to dispose of their stock at prices which meant that they were unable to liquidate the original loan and had further indebtedness to contend with now, in addition to their other difficulties."

Will Pay In Full

"Despite that," said Mr. Fream, "the farmers of Southern Alberta will in the majority of instances, if given the opportunity, work out their difficulties in making homes for themselves and will pay 100 cents on the dollar, even if it may take some time to put this into effect. All we need is the confidence of all parties in Southern Alberta and with this we have nothing to fear for the future."

To Holders of Five Year 5½ per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:

- (a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.
- (b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Dated at Ottawa, 8th August, 1922.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Many People Moving Away

We regret to report that Mr. T. R. Blaine finds it necessary to move away from Bow Island on account of exceedingly bad trade conditions in Bow Island and districts around.

Any town to be without a Drug Store is a serious matter but bad trade conditions will cause several others to leave this town at no very late period, people cannot stay and live without trade.

It is reported that R. S. Beattie is moving away from Bow Island to the States.

Mr. Ingoldby has moved some of his furniture to Lethbridge, as they intend staying there for a time. Mr. Ingoldby has secured work in a garage and will stay until Ethel is better, everybody is very glad to hear that Ethel is able to be out of the hospital, and trust she will soon regain her strength.

Mr. Downing has already left for Cranbrook and Mrs. Downing is leaving shortly.

The Public Suffers And Pays

A newspaper despatch from Detroit on August 27 reported Henry Ford as saying that, as a result of the coal shortage caused by the strike of the miners, 165,000 employees of the Ford Motor Company throughout the United States would be thrown out of employment on September 16, and that in addition several hundred thousand other workers employed in industries furnishing materials for the Ford plants would be forced into idleness. In other words, the means of livelihood of between one and two million people would be cut off.

These hundreds of thousands of men and their families are to suffer through no act of their own, but through a dispute with their employers—because it is well-known that the Ford employees are well paid and well-treated—but solely because of a labor conflict between the coal operators and the miners, and the latter being made to settle this difference of opinion by the waging of an industrial war, instead of endeavoring to reach an amicable settlement through an arbitration conference.

Why should these people be made the innocent victims of the unreasonableness and greed of others? Is our boasted civilization such a poor thing that leaders in public life, in finance and industry, and in the direction of organized labor, cannot devise any better method of settling their disputes than by a resort to war? Are these leaders so devoid of common sense and intelligence, so lacking in an appreciation of what constitutes right and justice, that they are ready and willing to inflict loss and suffering upon hundreds of thousands of absolutely innocent men, women and children? In their refusal to see any side to the questions confronting them but that in which is bound up their own selfish interests are they surely guilty of a criminal intent far surpassing many acts punishable by severe penalties under the law.

The coal strikes in the Canadian Maritime Provinces and in Western Canada have been settled and the miners have returned to work, but only after enormous and quite unnecessary losses have been inflicted upon both parties to the disputes, which might just as well, and ought to have been, settled by conferences before the strikes took place instead of after the strikes. Miners and mine owners alike have lost money, the public exchequer has been put to heavy and unwarranted expense—all of which the public must, in the final analysis, pay.

And now, with what is generally admitted to be the second heaviest grain crop in the history of the Dominion to be transported by rail and boat to the markets of the world just beginning to move, our transportation systems will likewise be called upon to handle an enormous volume of coal traffic in order to fill up empty coal sheds and bins which ought to have been handled during the slack months in grain movement. Instead of our transportation systems being enabled to spread the freight movement over a long period, they must cope with two peak loads at one and the same time.

Just what this means in further loss cannot accurately be estimated, but anyone at all familiar with the subject knows that the loss will be considerable because the business must be cared for in the most expensive instead of in the least expensive way. So, here again, the public must pay. The loss falls upon them. This is clearly revealed in present and prospective coal prices and also in the warnings being issued of the probable difficulty of obtaining adequate supplies of coal when they are needed.

Apart altogether from any question as to whether the miners or the mine owners are primarily responsible for these huge losses and inconvenience to the public, there is the much greater issue of the rights of people generally. Politicians must stop pussy-footing and abandon their attitude of timidity in dealing with the two opposing forces of Capital and Labor. Each is a great force and power in the nation. Each is essential to the well-being and prosperity of the country. Neither can get along without the other. But great and important as these issues are, they are not the issues of this particular group or that, or rather endeavoring not to antagonize either, must take a decided stand and tell both that this suicidal strike nonsense must cease, and that labor disputes must be settled in a sane and intelligent manner through processes similar to those provided by courts of law for the settlement of all other civil disputes.

Must Grab Fast

"Yes," said the third passenger to the airplane pilot, "I understand I'm to sit still and not be afraid, and all that, but tell me, if something happens and we fall, what do I do?"

"Oh, that's easy," said the pilot. "Just grab anything we're passing and hang on tight."

Of 25,000 miles of French roads in need of repairs at the close of the war 13,620 miles have already been improved and 2,300 miles have been completely and permanently repaired.

The elephants of Ceylon are esteemed for their superior strength and docility.

British Capital May Open Branch Plants

Manufacturers Eager to Have Goods Produced in Canada

F. W. Field, British Trade Commissioner, who returned to Toronto after two months in England studying trade conditions there, states that there is every cause for optimism. Generally speaking, he said, the outlook was brighter than it was a year ago, and there was a better feeling among the business men of Britain.

One of the most hopeful features, said Mr. Field, was that hundreds of representatives of British businesses were at present travelling about the world seeking markets and investigating conditions. Many of these men, he said, would visit Canada, where their capital was again beginning to seek an outlet.

British manufacturers, he explained, were anxious to enter into cooperative relations with Canadian factories and distributors. Not only were they eager to place their money in Canadian enterprises, but they were also seeking to make arrangements for the manufacturing under joint directions of their products in Canadian factories already established.

While it was true that British capital, in many instances, completed investment in Canada through the establishment of branch plants, the general tendency was to make use of the manufacturing facilities already established in Canada for the production of their goods.

WHEN WOMEN SUFFER

Look for weakness or ill-health. See if there is not a side ache, headache, restlessness, nervousness, or any of the symptoms indicate that you need the gentle assistance of Dr. Hamilton's Pills. This soothing medicine is a great friend to womanhood. They are a wonderful relief to the sufferer, they clear up sick headache, remove wastes and poisons from the system. Girls and women can use Dr. Hamilton's Pills with great success. Thousands upon thousands of women testify upon Dr. Hamilton's Pills to the fact that they are a wonderful relief to the sufferer, they clear up the system and keep it in smooth running order. 25c all dealers or The Catabarone Co., Montreal.

Women Losing Little Toos

In support of his assertion that women are losing their little toes, a scientist points out that in the days of ancient Greece women had three little to lose their toes. While it is known that Egyptian women had four, nowadays women have only two little toes, while there are many cases in which only one joint is found.

SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during the hot weather give the little ones Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaints if given occasionally to the well child and will promptly relieve those who are ill. They come on suddenly. Baby's Own Tablets should always be kept in every home where there are little children. There is no other medicine so good for the mother as the Tablets of a government analyst that they are good for the mother. The Tablets are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

How They Do It in Europe

Revert to Barter System to Overcome Exchange Problem

Barter, or the exchange of goods, as against the transfer of actual cash has figured in recent international local, according to the Geneva correspondent of the London Observer. In this way the difficulties of exchange have been overcome.

Rumania washed a loan of 45,000,000 gold francs from Switzerland. The Swiss said it was impossible unless they knew how the money was to be spent. Rumania replied: "We need to replenish railroad rolling stock, particularly engines."

"Fine," said the Swiss bankers, "we have these for sale. Take them, and pay for them in cereals and petroleum, both of which you produce and we need." Thus were the arrangements concluded. Similar borrowing and paying by barter also has taken place with Czechoslovakia. Here, again, Czechoslovakia is receiving Swiss manufactured goods and is to pay for them with truck loads of sugar. Therefore, the question of exchange and the comparative value of the Czechoslovakian krouna and the Swiss franc does not arise.

Healthiest Year

Figures compiled by thirty-seven life insurance companies show that 1915 was the healthiest year for Canada of which there is any record.

Ask for Minard's and take no others
There are no taxes of any kind in the Island of Alderney.

Radio a "Gusher"

Many Millions Will Be Lost In New Industry

Within the last three months at least 1,250 new corporations have been organized to manufacture radio apparatus. All of these cannot have the best technical skill back of them and many of these new corporations must fail. Hundreds of thousands of people throughout the country think that the radio is a "gusher."

That it will bring back in dividends many times the principal invested. Many people would think twice before investing their money in gilt-edged securities, but when the magic word "radio" is whispered they are ready to invest. The tremendous strides of the radio industry within the last few months and make up their minds that they are going to get out of the bank and get into radio. There have been millions lost in oil and mines but there will be many more millions lost in radio. The situation is well on the way to parallel an oil boom and in the wake of the tremendous enthusiasm created, unscrupulous promoters and so-called "experts" are relieving small investors of their savings. In addition to the best engineering and financial questions there are always the manufacturing and marketing problems which must be solved before investments can pay back one penny on their principle. There is always the question of patents and recent investigations have disclosed the astounding fact that 37 radio manufacturers at the present time are infringing upon each other's patents, and at least 1,000 other manufacturers are infringing on the patents of several of the radio companies. Of course the person who invests his money in these concerns must suffer. Let the investor, before placing a dollar in any business, study it thoroughly. Let him find out whether the man who backs it is a reputable business man or an unscrupulous operator, and sometimes even that is hard to ascertain.—From the Toronto Telegram.

Business Is Business

In announcing that Britain would pay her debt to the United States, Premier Lloyd George also announces that Britain's allies would have to pay her. Thus ends the romantic notion that the nations, dismissing all economic considerations, would forgive each other their debts and have a good cry on each other's shoulders.—Kansas City Star.

No Rest From Business Impossible to Escape It Even On Ocean Liner

A sea voyage on a fairly comfortable liner that took a voyager for five or seven days out of reach of telegrams or telephones or daily newspapers used to be the ideal way to obtain a short rest, by getting away from the hurly-burly of "modern" life. But the liners have become wireless, wireless telegraph has come along to invade the quiet and seclusion of the sea, the radio telephone has brought the bustling world about every steamer of considerable size, and now the last straw had been added by the publication of "Neptune News," a daily newspaper printed on all the ships of the United States Lines. Soon there will be no spot on sea or land safe from the intrusion of incessant rush and "business"—Christian Science News.

Radium Institute

Quebec Government Prepares For Opening in Montreal

The Quebec Government has now opened for the opening of the Radium Institute in Montreal, in accordance with the announcement made by Premier Taschereau. At a meeting of the cabinet held at Quebec it was decided to purchase one gram of radium from the United States Radioactive Company of New York, at the rate of seventy-seven dollars per milligram.

New Stock Feeding Plan

Finish Sheep and Hogs on Cleanings of Western Elevators

A Vancouver syndicate is being organized to finish sheep and hogs on cleanings of western elevators. Cleanings contain a large percentage of various weeds that still make good fattening for food. The danger in selling promiscuously is that the seeds might become scattered and create a noxious weed danger. The plan is to centralize the stock in feed centers where no danger of spread of noxious weeds could exist. The plan is receiving very serious consideration by elevator and packing plant men.

War In The East

The Cross versus the Crescent

After defeating the Greek army with great slaughter the Turks are now at the Dardanelles and it is feared that they will fight to obtain Constantinople and the Straits of the Dardanelles.

The French and Italian troops have been withdrawn but the British troops now in the neutral zone of the Dardanelles although only few in number are showing dauntless courage by facing the powerful Turkish army in an endeavor to prevent the Turks from capturing the Dardanelles.

Reinforcements should be rushed to the aid of this heroic little band of British troops or else they may become the victims of a weak and nervous policy of the faint hearted.

Many are Interested in Conversion Proposals

Returns received to date by the Department of Finance indicate a very general acceptance of the proposals for the conversion of 1922 Victory Bonds into new bonds bearing 5 1/2 percent interest and running for a further period of five or ten years as desired. Many holders would like to take considerably more of the new bonds than of the maturing issue, but this is not permitted as cash subscriptions are not being invited at this time. It is open, of course for such persons to add to their holding of 1922 bonds by purchasing them in the market or from holders who require cash, and then to surrender them for new bonds. It is known this is being done.

Winnifred

Friends of Mr. Louis Costelloian regret to learn he has been admitted Hospital for a short time caused by blood poison in his knee-cap caused from a fall.

Mr. M.H. Smith, Mr. Geo. Oliver, Mrs. V.M. Bryant and Master Jackie attended the Community Carnival at Medicine Hat Sept. 18th. To witness the crowning of the Carnival Queen, all report it a grand success.

Rev. H.C. Woods, wife and daughter June, were visiting friends and relatives in Winnifred on Monday enroute home to Magrath.

Wedding Bells

Mr. George Barbour and Miss Dorothea Denison Married

A very pretty wedding was solemnized at the home of Mr. and Mrs. J.W. Denison on Sunday Sept. 17th, at 4 p.m. when their youngest daughter, Dorothea, was united in marriage to Mr. George Barbour of this place, in the presence of the family and a few intimate friends. The ceremony, performed by Rev. Hockin of Bow Island, assisted by Rev. Rodgers was very impressive.

The rooms were decorated with autumn flowers and were a bower of beauty.

The bride was gown in peach colored crepe de chine and carried a bouquet of roses. From a little girl she has grown up in our midst, bred and honored, alike by young and old, she is a young lady of many graces and is capable of filling with happiness the home in which she will reign.

The groom is a highly respected young man and at present holds a position with the Lake of the Woods Elevator Co. of this place.

After congratulations and good wishes were expressed the party repaired to the dining room where a very bounteous dinner was served.

The out of town guests were Mrs. Edith Smith of Barons Alta., Mrs. Mrs. Ernest Denison of Medicine Hat and Miss Thelma Stevens of Penman, Sask.

The event marks the most important milestone in their lives. A new home is made, a new start in life commenced under the most auspicious conditions and so with their hosts of friends wish them a long, pleasant and prosperous life.

Maleb News

Mrs. W. Shaver gave a reception last Friday at the home of her daughter Mrs. M.L. Bowen, a very large number of friends attending, and a delightful afternoon was spent: being as everyone is very busy harvesting their crop now, it was decided to hold the U.F.W.A. meeting at the same time, as many might be too busy to attend the meeting in a week's time.

The next meeting will be held at the home of Mrs. C.H. Reynar on Thursday October 5th.

Mr. Morris Gibbons and family were the guests of Mrs. Hurlbut last Sunday at Bow Island.

The infant daughter of Mr. and Mrs. M. Gibbons was baptised, Elena Madeline, last Sunday the 17th, at St. Michael's Church by the Rev. Father McCoy.

Mrs. Gibbons and little Elena came home last Tuesday with Mr. Gibbons where they received a warm welcome by a host of friends.

Bow Island

Continued from Front Page

We are very sorry to report that Mr. D. Needham who has been working on Mr. Kirsch's threshing outfit had to quit work last Wednesday evening on account of having blood poisoning in his left hand. Several days ago he got a silver in his finger which with the irritation of the work started the blood poisoning. We hope that it will soon be better.

Mr. and Mrs. R. A. Salisbury of Trechu, who came down to look after their crop interests, at Winnifred returned home last Wednesday, calling at Bow Island on their way, they made the trip by car and report a nice journey, but say the crop did not turn out very good. We are always glad to have Mr. and Mrs. Salisbury in our midst, are sorry to see them go.

Mr. A. Goodyear was a town visitor last Saturday. Mr. Goodyear says he intends putting in quite a good acreage to Fall Wheat. The Review sure wishes Mr. Goodyear the very best of luck, for he sure deserves it, being a steady and reliable hard worker and an all round good farmer.

8 p.m. Preaching at Bow Island

Sunday School Sessions each Sunday
11 a.m. at Bow Island and Haig
2:30 p.m. at Haycroft
2 p.m. at Fairlight

Sunday Services October 8th.
1:30 p.m. Preaching at Lansdale
2:30 p.m. Preaching at Fairlight
8 p.m. Preaching at Bow Island
Everybody is welcome at these meetings.
C.G. Hockin, Pastor

Mrs. Ware and son left for Vancouver last Saturday, to rejoice her husband there.

Mr. T. R. Haden made a trip to Medicine Hat last Wednesday.

Mrs. Elkin and family went to Medicine Hat on Tuesday, where she will stay for a few days.

Miss Ellen Leary returned from Vancouver on Tuesday evening, and will be staying home with her mother.

The Rev. Mr. and Mrs. Hockin moved to Medicine Hat on Tuesday, accompanied by Mrs. A. Gage and son Robert.

Mr. and Mrs. Bull and son Arthur of Malab, were the guests of Mrs. C. Avery last Sunday.

Miss Helen Nickolas came into town last Saturday from the farm to spend a week in town, and look after her younger brothers and sisters who are attending school here; while Mrs. Nickolas goes out to the farm.

Coat Lost, Reward

Lost a girl's Brown Coat (almost new) on Sept. 18th., near Municipal Shed, Bow Island, coat had long belt and high collar. would fit child about 10 years of age.
A reward will be given for return of same to
Scottie MacDonald
4 1/2 miles S.E. of Bow Island or Review Office

Mrs. M.E. Pippard and daughter Mary came into town last Friday, staying with Mrs. Ridgdale until Sunday, when Mr. and Mrs. Ridgdale took them in the car to Medicine Hat, from where Mrs. Pippard and Mary started on their trip to England, they will visit first Mrs. Pippard's mother at Oxford and will then go to many other places to visit relatives and friends while there. They are expected to return to Bow Island in the spring.

Mrs. Pippard and Mary will today Friday 22nd, from Montreal, on the C.P.R. Liner Montclair, en route for London, England.

Mrs. F. J. Henderson returned home last Saturday evening from Spokane, Washington, where she has been for some time visiting her son there.

Mr. J. Pollitt's horse ran a nail into its hoof which has swollen up so as not to permit his use on the road, on Monday morning the milk was delivered in Mr. Ingoldby's car, but since then Mr. Pollitt has secured another horse to take the same one's place, who we hear is now getting better and will be on the road in a few days.

Mr. Veigandshill of Foreman was a Bow Island visitor last Tuesday, he will be leaving for the States after selling his goods by public Auction on October 5th.

AUCTION SALE

An Auction Sale will be held on the farm of M.C. Veigandshill, S.E. 1/4 of Sec. 6-Tp. 8-S. 11. 15 miles South and 1 mile East of Burdett, and 9 miles North and 1 mile West of Foreman on Thursday 5th, October. Sale to commence at 10 o'clock sharp, with a free lunch at noon, everything must be sold as Mr. Veigandshill is moving away to the States.

Mr. James L. Larsen will be the Auctioneer.
See the Auction Posters out in all the surrounding districts.

John McIntosh the new C.P.R. assistant agent says he will remain in Bow Island and attend school.

Mrs. Cullen and children arrived home last Tuesday after visiting friends in Macleod.

N-O-T-I-C-E

A further Extension of Time allowing the Discount of 10% will be given until October 14th 1922 on Current School Taxes only

The Harvest Is In We will be glad of YOUR SUBSCRIPTION

Opening of Schools of Agriculture at Olds, Claresholm, Raymond, Vermilion

Classes open October 31st.

ACCOMMODATION

Dormitory accommodation provided for girls at Olds, Claresholm and Raymond Schools under supervision of matron and lady teacher.

Also additional accommodation at reasonable rates in respectable homes in all four centres.

Free Courses in Agriculture and Home Economics.

Minimum Age. 16.

Students from Gleichen and Youngstown districts transported free of charge to schools at Olds, Claresholm or Raymond.

Hon. Geo. Hoadley,
Minister of Agriculture.
H. A. Craig

COURSES IN IRRIGATION

Special Courses in Irrigation are provided at the schools at Olds, Claresholm and Raymond.

Principals,
F. S. Grisdale, Olds.
O. S. Longman, Raymond.

Principals,
J. C. Hooper, Claresholm.
S. H. Gandier, Vermilion.

Deputy Minister
of Agriculture and
Superintendent of
Agricultural Schools.

Makes Claim That Germany Is One Of The Richest Countries In The World

Germany is one of the richest countries in the world, according to the London Daily Mail. National wealth does not consist of money but of tangible property and goods, and it is increased by production.

Germany is far wealthier than France. All North Germany is a level plain, very fruitful and easily cultivable, and it is opened up by a unique system of great flowing, deep rivers which can be connected, while France has little level ground and only turbulent or small rivers.

The principal wealth of nations is created nowadays in factories. Modern industry depends upon coal, and Germany has lost a good deal of coal by the peace, but in the Ruhr Valley alone she has about 100,000,000 tons of coal—twelve times as much as all France and considerably more than the United Kingdom, the writer states.

For international commerce Germany has the best position in the centre of Europe. Last, but not least she has more than 60,000,000 inhabitants, while France has less than 40,000,000. Owing to her superior natural resources of every kind, her man power and therefore her production, Germany is undoubtedly richer than France, in the writer's opinion.

Germany's industries are extraordinarily prosperous, but their prosperity is disguised as far as possible. German chemical imports are hampered by high tariffs, prohibitions and Government subsidies. Nevertheless, gross profits in chemical industries increased ten-fold between 1916 and 1921 and net profits five-fold.

In one company, although figures were written off and hidden in other ways, says the writer, dividends equivalent to 10 per cent of the capital of 1916 were paid. To disguise that fact the capital of the company was increased nearly eight-fold, and the shareholders, besides receiving 20 per cent in cash, got huge dividends in shares allotted to them far below the market price.

Similar conditions prevail almost everywhere, he continues. Germany has become the company promoter's paradise. During the first quarter of 1913 new issues came to 12,500,000 marks. During the first quarter of 1922 new issues came to 12,101,700, 600 marks, or 100 times as great.

We are told that Germany is crushed by taxation, that her per capita income tax is the highest in the world, he says.

Unfortunately, the high nominal rates do not yield corresponding revenue, because people refuse to pay. Those who defraud the revenue are heavily punished, but the names of all and their names are not published, as in Great Britain.

According to the official forecast, Germany's national revenue for the current year is to come to 102,208, 58,677 marks. At the present rate of exchange that figure is equivalent to about \$20,000,000. Before the war Germany's revenue came to 4250, 000,000.

British taxation yields from four to five times as much as before the war, while German taxation yields one-fourth as much as in the pre-war year.

Perian Lamb Fur

Original Karakul Sheep Come From Central Asia

The fur commonly known as Persian lamb is taken from young Karakul lambs. The common practice is to kill the lambs when but a few days old, as the character of the fur deteriorates with greater age. The skins of prematurely born lambs have value as fur, but even are not sacrificed to secure them.

The Persian lamb fur used in this country is produced in Central Asia, chiefly in the Khazax or principality of Bokhara, situated between Turkistan on the north and Afghanistan on the south, though a few Karakul sheep are kept in the territory adjoining Bokhara. The term "Persian" seems to have become attached to this class of fur because of the fact that at one time it was sent to Europe through ports in Persia. The Karakul sheep takes its name from Kara-Kel (black lake) a village in the eastern part of Bokhara.

It appears that the foundation of the present fur-bearing sheep was the early native Arab. The blood of the Arab has been disseminated, and in common with that of the Dardarian, produces the sheep kept in the vicinity of the village from which Karakul derives its name.

The name Karakul is sometimes written Karakul. It is pronounced Karakul with the major accent on the last syllable.

W. N. K. 1923

Fruit and Vegetable Pests Numerous

Insects Cause Trouble to Gardeners in Various Parts of Canada

The Entomological Branch of the Dominion Department of Agriculture is dealing with the insect conditions in June, report the grape leaf hopper particularly active in the Niagara district; the leaf caterpillar especially numerous in the Maritime Provinces; and fairly so throughout Canada; the bud moth usually abundant in Nova Scotia, Ontario and British Columbia; the gooseberry borer busy in Southern Quebec; the Measuring worm giving trouble in British Columbia orchards; the Currant Sawfly and Spawworm heard from in Quebec and Ontario; the Strawberry Root Worm causing injury in Southern Ontario; the Strawberry Weevil showing vitality in the Maritime Provinces and the Strawberry Root Weevil (a different species) in British Columbia. Successful efforts are being made in Southern Ontario to check the activities of the Rose Chaffer, but the Raspberry leafroller is unusually prevalent in Southern Ontario, where the Rose scale is also in evidence. The Cherry Worm is also noted in certain sections of Ontario. As regards vegetable pests, Cucumber beetles are reported from all parts of the country. Numerous than usual, Flea Beetles are particularly injurious on potatoes, turnips, tomatoes and cabbages. Maggot is exceptionally active in parts of Ontario, Quebec and British Columbia.

The Faithful Earth

No Matter What Happens Nature Refuses to Turn Backward

Men sneered at the July weather, but men's friend, the good old brown earth, smiled over it. The reason is made plain, in the United States report forecasts.

Three billion bushels of corn—the fourth largest in the farming history of the United States.

An increase of 15,000,000 bushels of spring wheat.

A record crop of hay—33,000,000 tons.

The second largest crop of white potatoes ever grown in the world.

Two bushels of apples for every person in the country.

The fourth largest tobacco crop.

Up in Canada, the crop estimators say that the production of grains of all kinds will far exceed last year's harvest.

Even in Russia, where everything else has gone to smash, Nature refuses to turn backward. The wheat harvest, says Moscow, is more than enough to feed the entire Russian population for a year.

It is marvellous the way that this planet, plagued by wars, strikes, gratters, tax eaters and common or garden food, manages to sprout enough food for the Two Billion—From the New York Herald.

Just Made Over

After Mr. Brown had raked his yard he took the accumulated rubbish to the street and found that his neighbors' children came flocking about the bagful, among them a little girl whom Mr. Brown did not remember having seen before. With a man's fine womanliness, to make the stranger feel at ease, he said: "Hello! Isn't this a new face?" "No," she stammered, "it ain't new, it's just been washed."

Memoirs of Lloyd George

British Premier Says All Profits From Book Will Go to Charity

Premier Lloyd George has made it known that all the proceeds of his forthcoming book will be devoted to charity. In certain sections of the press over the propriety of the book of the Government writing in book form his opinions, containing official information, while he is still in an official capacity, and making money thereby, it was in reply to this that Mr. Lloyd George authorized a statement which says:

"There have been a large number of articles, pamphlets and books published from time to time, containing criticisms of his (the Premier's) direction of the war, some of them written for obviously partisan reasons and promulgated by partisan signs hostile to his Government. These publications contain distortions of fact calculated to mislead the public. The Prime Minister feels impelled, therefore, to publish at the earliest moment his account of the great struggle."

"He already has made considerable progress with writing his story and means to devote some part of his holiday to further prosecution of the work. The Prime Minister feels unqualified, any person desirous of getting himself out of the story of the struggle and suffering of the nation during the Great War, and intends that the whole profits of his book shall be devoted to charities connected with the relief of suffering caused by the war."

Will in Shorthand Declared Legal

Characters Recently Translated by Court Shorthand Reporter

A will written in shorthand on a telegraph blank has been admitted to probate in the great Lakes question. It was written by Charles B. Orris, a commercial traveler, who adopted phonetic writing as the quickest means of expressing his wishes regarding the disposition of his large estate when informed by the doctor that he had only a few hours to live.

The stenographic characters were so perfectly executed that they were readily translated by the official shorthand reporter of the court in which the will was offered for probate.

Need Suitcase For Money

Pocket Books Too Small to Carry Russian Currency

Canadians contemplating visits to Russia should bring with them suitcases of ample proportions in which to carry their money, for ordinary pocket books have long since ceased to be adequate for carrying the huge quantities of paper currency that one is required to have in order to exist.

The following money from one of Moscow's leading restaurants last night that one can dine rather well for 25,000,000 rubles; 30,000,000 rubles; breakfast, 1,000,000 rubles; soup, 2,000,000 rubles; cabbage, 6,000,000 rubles; strawberries, 4,000,000 rubles; potatoes, 2,000,000; ham (two slices), 4,000,000; chicken, 6,000,000; coffee, 1,250,000.

A man has succeeded in traveling across France by canal and rivers, and back again, in a paper boat.

Feeling causes convulsions among young bears.

Great Importance Of Cold Storage Plants As Stabilizer Of Markets

Wants a Slice of Canada

Another United States Legislator Has Hatched Idea

Still another United States legislator is after a slice of Canada. Cession to the United States of that portion of Canada embracing the whole of the Great Lakes and connecting waters, in payment of Great Britain's war debt, was proposed by Representative Macgregor, of New York, in the House at Washington.

Representative Macgregor is not at all selfish in making this proposal. On the contrary he is altruistic. The gift of territory, he holds, is not designed to benefit Uncle Sam, but is for the purpose of assisting the life of Canada that he proposes to remove to the southern side of the border. He told the House that "it would be a great blessing to that portion of Canada to be a part of our great country."

Furthermore, he seeks out only to benefit Canada, but also to benefit the world—all humanity in fact. "The people in that portion of Canada, he would be immensely enriched," he said, "and the United States would round out its territory at a point where it would be of benefit to the world to humanity to be under one jurisdiction."

Some light on the proposed "benefit" was given by Mr. Macgregor's statement as to the possibilities of this scheme. "It would make possible the development of both the Great Lakes and the great St. Lawrence," he said. "It would make both sides of the Niagara River the great industries of the world by freeing the development of power at Niagara Falls from boundary questions."

After outlining his little plan for uniting Canada and humanity, Mr. Macgregor devoted the remainder of his speech to an attack on Great Britain based on the Indian note regarding international debts.

Enlisted As Single Though Married

G.W.V.A. Successful in Securing Separation Allowance Covering Over Four Years

The constabulary which resulted from the enlistment of Sapper C. Mear of Winnipeg, as a single man, has now been straitjacketed out. Early this year, from the date of his enlistment, Cheques for nearly \$15,000 have been sent to him by the Military Department, as a result of which Mr. Mear failed to give her consent which was necessary at that time for marriage to sign up, so Mear decided to go as a single man. He joined the C.E.F. at Winnipeg in January, 1915, and served overseas until May, 1918, when he was discharged. On the strength of letters received from his wife Mear attempted to secure a separation allowance from the Government, but the authorities refused the restriction concerning married men were removed. For some reason this was not granted. Following discharge from the army at Winnipeg, Mear placed the matter in the hands of the G.W.V.A. and it was subsequently referred to the Adjutant General's office of the Dominion Command of the Association. After numerous substantial documents had been brought forward to the authorities the claim was finally settled last week when cheques totalling nearly \$15,000 were sent to Mear and his wife, covering separation allowance for four years and four months, and dependent's portion of war service gratuity.

Could Bombard London

French Cannon Seen Able to Dominate Coast

The big Bertha which bombarded Paris could have reached the suburbs of London if the German had captured Calais. London may yet be under foreign bombardment if one may rely on a report made by General Herer, the French artillery leader at Verdun, and one of the greatest artillery officers in the war. He says that the Allied armies on the Rhine have under artillery range the entire province of Westphalia, the Grand Duchy of Hesse and Baden, Wurttemberg and Bavaria, and he adds:

"As for the defence of our coasts the French cannon will soon be able to dominate the sea from the mouth of the Meuse, taking in all Belgium, encircling Harwick, London, Paris, Rouen, Southampton, Portsmouth, Dartmouth, Cornwall and the west coast, then encircling down upon the coast of Spain to a point half way between Santander and Bilbao. From a purely maritime viewpoint the entire English Channel will be under the range of our fire."—Toronto Globe.

Give your local merchants a chance. Buy at home.

The rapid growth of cold storage in Canada during the past quarter of a century is not surprising when the multifarious uses to which it is put are taken into consideration. With out winter months, the consumer can secure unseasonable goods in reasonable condition from the cold storage plant. Not only does the modern cold storage warehouse perform the functions of a storehouse, but also acts as stabilizer to the state of supply, storing and distributing goods as the state of the market warrants.

In 1907 the Canadian Government, recognizing the importance of cold storage facilities and desirous of having reformed policy for the future guidance of the industry, passed a bill entitled "The Cold Storage Act." This Act, among other things, provides for subsidies to individuals or companies towards the construction of cold storage warehouses upon the public, and administered by the Federal Department of Agriculture. Up to and including 1920, the Dominion Government has subsidized 14 cold storage plants with a refrigerated space of 4,283,304 cubic feet, to the extent of \$64,185.

A great deal of subsidized and non-subsidized cold storage plants in Canada in 1920 by the Federal Bureau of Statistics, disclosed the fact that there were 232 plants operating with a refrigerated space of 32,547,274 cubic feet. Ontario led all other provinces, with 11,107,577 cubic feet. Quebec was second with 6,648,000 and a space of 6,230,104; followed by British Columbia with 3,418,301; Manitoba, 4,408,147; Alberta, 20, 2,806,535; Saskatchewan, 25, 1,560,964; Nova Scotia, 1, 1,000,000; and Prince Edward Island, 2, 969,541; Prince Edward Island, 4, 224,000; and the Yukon, 1, 42,900.

The rapid increase in the number of cold storage plants in Canada, the practice provinces, which are big producers of meat, are located at a considerable distance from their main markets, which in the early ranching days, was a disadvantage in the sense of the growth of the industry, forcing the ranchers to ship their cattle long distances to the coast, where they were sold at a considerable loss. With the establishment of cold storage plants at convenient points throughout the country, the cost of shipping was minimized, and the packer was able to put up large quantities of meat products, which could be shipped at a profit through lack of immediate sale. In order that these products might reach the markets in a fresh condition, a special railway service was established with cold storage accommodation, large numbers of which are in daily use.

In the fruit and vegetable business, cold storage facilities have been established at convenient points throughout the country, which in the early days of the industry, was a disadvantage in the sense of the growth of the industry, forcing the growers to ship their produce long distances to the coast, where they were sold at a considerable loss. With the establishment of cold storage plants at convenient points throughout the country, the cost of shipping was minimized, and the grower was able to put up large quantities of produce, which could be shipped at a profit through lack of immediate sale. In order that these products might reach the markets in a fresh condition, a special railway service was established with cold storage accommodation, large numbers of which are in daily use.

Another manner in which cold storage is utilized and which is probably the most familiar to the average citizen is the storage of poultry and dairy products. During the summer months it is essential that these commodities be kept in a cool place, and stored out of market conditions demand that they be stored in cold storage. It is essential that these commodities be kept in a cool place, and stored out of market conditions demand that they be stored in cold storage.

There are now in the course of construction throughout Canada, or have been completed since the last census was taken, several modern and commodious plants, notably that of the Montreal Harbor Commission's warehouse, which is one of the largest on the continent. This plant is designed to provide 5,000,000 cubic feet of dry storage, 1,500,000 of cold storage and another million feet of dry storage. The building is estimated to cost in the neighborhood of \$2,250,000.

Investigations are being made at the present time by various organizations interested in the feasibility of constructing a cold storage plant in this country and shipping the produce across the Atlantic to England in cold storage as market demands warrant. Should this scheme bear fruit, it would mean a tremendous impetus to the cold storage industry and do much for the stabilization of the Canadian Cold Storage Industry.

It sometimes does you good to hear no good of yourself.

THE QUESTION OF THE HOUR

—Louis-Edouard

Entirely New Treatment For Bronchitis, Catarrh

No Internal Medicine to Take

Years ago the profession fought Catarrh by internal dosage. This opened the stomach and didn't remove the trouble. The modern treatment consists of breathing the healing, soothing essence of Catarrhinol, which goes instantly to the source and the trouble. Catarrhinol is successful, because it penetrates where liquid medicines can't go. The balsamic vapor of Catarrhinol drives out the germs, soothes the irritation, relieves the cough, makes Catarrhinol disappear quickly. For bad throat, coughs, bronchitis, Catarrhinol is a wonder. Two months' treatment one dollar. Small size box. Sold everywhere or The Catarrhinol Co., Montreal.

Bar B Ranch, August 2nd, 1922, 19—
The Bar B Ranch is bounded on the north by Lawrence Place, on the south by the United States border, on the east by a barbed-wired fence five strands high, and on the west by the Banishes River. Across the river is the Indian Reserve on which Mr. Hingham "owns" his cattle. The house is built quite close to the river, and at night I can hear the Banishes whispering over the submerged island which serves as a ford. I am not at all sure that I like the Banishes. It is too swift and too deep and too cold. Each person I have asked tells a different story to account for the river's name, but the most probable one is that it is a corruption of the Indian name, but the most romantic one, and therefore the one that I prefer, is as follows.

Years and years and years ago a young Irish prospector came here one night in the early spring, at the witching hour he awakened his companion with the blood-curdling declaration that he had heard the Banishes. The companion, a hard-headed Scot, laughed at his friend's earnestness and traced the sound to his own satisfaction, to a money pack-mule or a suddenly awakened eagle. But the Irishman, true to his blood, was not to be convinced, and now comes the point of the story. When the two young men reached civilization again all doubts vanished for a letter awaited them announcing the death of the Irishman's eldest brother on the very day when the Banishes had been heard! Of course our friend succeeded to the title, married one of the girl's nieces, and carried under his carriage belt, and lived happily ever after.

The Hingham house is absolutely perfect for its purpose. It is a big square place, painted white with green trimmings, and has a ten-foot veranda almost all the way around. On the south side there is a balcony which can be closed in with the greenhouse fashion—during cold weather, and it is here that Mrs. Hingham intends to sit all the winter through.

Entering the house by the front

door, one comes directly into a large room, which is hall and living-room combined. An immense open fireplace, built of water-worn stones from the Banishes, and an open staircase go on a long way towards the back of the room. One would expect the piano and the other impediments of civilization to look out of place in such conventional surroundings, but they do not. It is as if they had been chosen. There is not an inch of plaster on the walls, and the room is paneled from floor to ceiling with British Columbia fir. To call it a room is to make a mistake, for around this is for mounted heads and antlers, Indian head-work, and the right sort of pictures? In the hall and in the living-room are no pictures of bears and wolf's heads, instead of carpets; the other rooms have bare floors.

We are twenty miles from a town, but we have a real bathroom, usually a very ugly modern windmill— but here a wide-winged Dutch one on my farm. And the house is lighted throughout with gas generated by an extraordinary plant in the back meadow.

My bedroom is in the west side of the house, and from my window I have a glimpse of the mountains. It is perfectly lovely to be able to dry a hat whenever and wherever the spirit moves me, and when I had hung my pictures and scattered my various belongings around the room in what the novelists call "studied disorder," I began to feel very much at home.

The animals inhabiting the region of the Bar B are more numerous than might be imagined.

I shall name, classily and otherwise, dispose of the quadrupeds first, because I can wait no longer to do so.

Cupid, the horse of my dreams, who is to be mine to live and to hold so long as I am on the Hingham ranch. He is a beautiful little sorrel, with a cream mane and tail, a cream star on his forehead, and a truly angelic disposition. I very truly hugged the dignified Mr. Hingham when he told me that he had given the foreman orders to the effect that Cupid was to be considered my special property! Of course I cannot say very well as yet, but Mr. Livingston says that I am "doing as much good as expected."

One would think that I was recovering from a severe illness. He looks with unconcerned scorn upon my ridiculous, and advises me at regular intervals that I am "looking better."

Mr. C. E. Rayman, Lindsale, Alta., writes:

"I was a great sufferer from kidney disease and lame back for more than ten years. A friend once gave me a box of Dr. Chase's Kidney-Liver Pills, and acting upon his advice I tried them. After I had taken one box I felt better, so I continued until I had used five boxes. By the time I felt as well and strong as ever, and am glad to recommend Dr. Chase's Kidney-Liver Pills to anyone suffering as I did."

Dr. Chase's Kidney-Liver Pills, one per dose, 25c a box, all dealers, or Edmondson, Bates & Co., Ltd., Toronto.

What Pinnie Found at the End of the Rainbow.

Don't you ever tell you about the time that Pinnie started out on a long, long trip in search of the treasure at the end of the rainbow? And it seems that once when he had been wandering around—the world where humans live he had heard some people talking of some mysterious treasure at the rainbow's end; so then and there he decided to go.

"It should be very easy for me to reach the end of a rainbow," he reasoned to himself, "because I live at the end of the earth. It will be no trouble at all, and the very next time a rainbow shows itself in the sky I shall hurry and get on it and I shall travel along it to the very end of the rainbow. If it is only a rainbow would come!" It was he could do to wait for one.

At last his chance came. It had been storming, and suddenly the clouds parted and a beautiful rainbow began to dawn across the sky. The little Browne was so fascinated watching it delicately tinted, thin, appear and blend, that for a bit he actually forgot his long hinged plan to journey along the heavenly bridge. But he only forgot for a very few moments. He threw his hat high up in the air, gave two or three delighted yells at the top of his lungs and dashed to tell Stella, who was about to do.

A queer little smile hovered on the Wishing Piny's lips as she listened, and his voice was very gentle and tender.

"I'll help you all I can, Pim, dear," she said, "or I'll have my magic wand over you so that you will find yourself well started at the beginning of the rainbow, and you will not have to waste a lot of time hunting around the rim of the earth for it. You will be quite a while and you'll be very, very tired when you return home, but you'll also be very, very happy."

"Because I shall have found the treasure!" Pinnie cried eagerly. "When I heard those two humans discussing it I rather fancied that it's a pot of gold. I hope I find it."

"You'll find a great treasure," she replied, "but it is far more precious than gold. Wait and see, and when you return be sure to come straight to here and tell me what happened."

And before he quite realized what had happened he found himself struggling and stumbling hurriedly along the rainbow. His eyes were strained, and he saw a pot of gold at the end of the rainbow. He was so thoroughly enjoying himself that he didn't really care.

"For," he murmured to himself, "what's a pot of gold anyhow? Finding the rainbow and feeling that I was a part of it is a wonderful thing. Just then the colors faded away and Pinnie found himself alone in the rain. He was surprised, but he didn't mind. He had, before, and also to find that he was in a tiny cloud and went fast along it. It is a dream or was it the Wishing Piny's voice that he heard in his sleep?

"Pinnie, dear," said the voice, "you have found the treasure and it is a better one than a pot of gold. You found a big and a beautiful truth—a lesson."

"But I've learned no lesson," the Browne deeply whispered, "at least, I don't know what it means."

"We often learn our most important lessons," the voice continued, "without knowing it. You have learned a lesson, and it is a great one. You have learned that it is not the treasure, but the journey that counts. It is not the gold, but the happiness that counts. It is not the thing you are striving for, but the joy that it gives you."

It was a long time before Pinnie could find the words to say to the voice. He was so happy, so content, so at ease, that he did not know what to say. He was so happy, so content, so at ease, that he did not know what to say.

He was so happy, so content, so at ease, that he did not know what to say. He was so happy, so content, so at ease, that he did not know what to say.

He was so happy, so content, so at ease, that he did not know what to say. He was so happy, so content, so at ease, that he did not know what to say.

He was so happy, so content, so at ease, that he did not know what to say. He was so happy, so content, so at ease, that he did not know what to say.

He was so happy, so content, so at ease, that he did not know what to say. He was so happy, so content, so at ease, that he did not know what to say.

He was so happy, so content, so at ease, that he did not know what to say. He was so happy, so content, so at ease, that he did not know what to say.

He was so happy, so content, so at ease, that he did not know what to say. He was so happy, so content, so at ease, that he did not know what to say.

Unbreakable Glass

is More Wonderful Than First Accounts Suggested

The unbreakable glass invented by Dr. Horak in Bohemia appears to be even more wonderful than first accounts of it suggested.

"I saw some of the glass at the exhibition at Hradec Králové, and Dr. Horak gave a demonstration," said a leading member of the local scientific community in London to a New Caste Chronicle representative recently.

"Not only did Dr. Horak throw glass plates and vessels on the floor from a height of 12 ft. without breaking them, but he roasted meat on a thin glass plate over an open fire, at a temperature of 400 degrees centigrade; melted tin in a glass pot, and drove nails into a hard piece of wood with a lump of his new glass.

"A tiny glass tumbler, scarcely one-twenty-fifth of an inch thick, was used in a stove to such a degree that wood placed in it was immediately charred to pieces. The glass, however, not only stood the heat but even remained unbroken when plunged into cold water while still hot. Dr. Horak has furnished his own kitchen with all kinds of glass pots and pans, and there seems to be a great future for unbreakable glass."

Expect Good Whaling Season

The Consolidated Whaling Corporation of Vancouver is again operating this year. It is stated that the mammals appear to be plentiful this season, and it is expected that an average catch will be made, probably about 3,000 whales.

As Lord Russell showed, we were easily inclined to mirth over the strange names of places abroad, while we regarded with some dignity names of places in our own country-side. No doubt there are men in Poughkeepsie and Medicine Hat who mean, if ever they come to Scotland, to visit Ashby-de-la-Zouch merely to see what a place so called could possibly look like. Distance lends enchantment to scenes and strangers to their names. The difficulty of taking the right kind of interest in things far removed from us is one of the political problems of this internationalized world. It runs through nature, but it is not in nature that we find interference to see ourselves as others see us. We all know what a town looks like to us, but if we knew what we would like to a town we should probably have with indignation—London Daily News.

Things Far Removed Often Seem So Near to Us

Niagara Grapes

Fifteen hundred cars of grapes will be handled by the Niagara Grape Growers' Association this year, almost double that of last year. The season has been one of the most successful for many years, with weather conditions most ideal throughout. The 1,500 cars the company will handle represent about 91 per cent. of the production of all the peninsula vineyards.

"I saw some of the glass at the exhibition at Hradec Králové, and Dr. Horak gave a demonstration," said a leading member of the local scientific community in London to a New Caste Chronicle representative recently.

"Not only did Dr. Horak throw glass plates and vessels on the floor from a height of 12 ft. without breaking them, but he roasted meat on a thin glass plate over an open fire, at a temperature of 400 degrees centigrade; melted tin in a glass pot, and drove nails into a hard piece of wood with a lump of his new glass.

R.C.M.P. INSPECTOR is Severely Injured

REGINA, Sept. 15.—Inspector T. V. Sandys-Wunch, R.C.M.P., suffered severe injuries to his right eye, when a defective tile backfired during practice on the barracks range. Reports from the hospital said the effect will not be permanent. Inspector Sandys-Wunch lost the sight in his other eye some years ago. He holds the indoor revolver cham-

ampionship of the world and was chosen a member of the Canadian team for the 1923 Brier at the Dominion rifle meet last month.

Burdett News

From our own Correspondent

Mrs. J. Rising and daughter living north of town motored to Bow Island last Wednesday.

Mr. McLean of Portland, Oregon, is spending his vacation here with friends.

Mr. Innes, principal of the Grassy Lake School, spent the weekend with principal Litt.

On Thursday September 14th, Miss Wiltin and Miss West, Nurses from the Dept. of Public Health, at Edmonton, held a very successful Child's Clinic at the United Church, under the auspices of the Burdett Women's Institute, the children were examined and in a short address given after the examination, the babies were pronounced particularly healthy. Before dispersing, light refreshments were served and a helpful and pleasant afternoon was brought to a close by a social hour.

BIG DANCE

Will be held in the Majestic Theatre Burdett on Friday Sept. 29th. Dancing starts 9 p.m. sharp. Good Music. Refreshments at the White Lunch. Admission: Gents \$1.00. Ladies Free. Everybody Welcome.

Mr. D. A. Mansfield has moved into the house known as "The Brown Cottage."

Mr. and Mrs. Reber who have been visiting in Regina and Saskatoon, have returned.

Your attention is drawn to the Advertisement of the Burdett and Bow Island Meat Markets where Beef can be bought at 7c. a pound and Veal Stew at 3 pounds for 35c. At this price, meat is within the reach of all.

On Sunday last, Mr. Craven of Medicine Hat filled the place of the Rev. Johnson, who was taking the place of the Rev. Richards at Medicine Hat. A goodly congregation gathered, and Mr. Craven preached a very bright and interesting sermon taking for his text, Psalm 122—v. 1. "I was glad when they said unto me, I will go into the house of the Lord." During the offering the choir rendered a bright and cheerful anthem, "O come let us sing unto the Lord."

On Sunday September 21st, the Sunday School in the United Church will celebrate Rally Day, there will be special services and music.

Mr. K. Brown spent the week-end in Lethbridge on business.

Mr. J. Llewellyn was a business visitor to Lethbridge on Monday.

Monday Sept. 18th. proved an unlucky day

Mr. N. D. Anderson of the Alberta Pacific Elevator was unfortunate in getting his fingers pinched in a heavy sliding door, crushing all his fingers, but one was hurt so badly that it will be a week or so before he can use his hand much.—On the same day Mr. Livingston while working on the section dropped a rail on his foot hurting himself to such an extent it was found necessary to take him to the Hospital at Medicine Hat.

Went Celebration Of Armistice Day As Distinct Holiday

HAMILTON.—G. R. McCullough, father of the Canadian Club, Bishop De Penier, New Westminster, B.C. told the association of Canadian clubs here that there should be a distinct celebration of Armistice Day; that it was too important to be merged into another holiday. The matter was referred to the resolutions committee. Bishop De Penier spoke on Canadianization. He said that in many towns in Western Canada English was not spoken; the people were ignorant of our customs and knew nothing of our flag. The original problem which would soon spread to all Canada was pressing in British Columbia where half the population of many towns was Japanese or Chinese.

One hotel was owned by Chinese who hired white men to work for them. He could not paint the mence in too dark colors. It was necessary for Canada's welfare not to allow any more Orientals into the country than we could Canadianize.

Unless we willing that our sons and daughters should marry Chinese and Japanese, we have no right to admit Orientals without number. Our motto for immigration should be that they must be white; that they must be Christian and British.

He said that the British flag was very often used as a flag of distress, that it was often flown upside down. Turning around he discovered that the flag on the platform was flying upside down.

Vernon.—Present indications are that the 1922 British Columbia pig crop will total about 2750 or 3000 cars.

Last season was the province's big crop year, when approximately 3500 cars were packed out. The C.P.R. has made many provisions to take care of the valley's transportation demands. On nearly every line there are the new refrigerators cars are waiting in line to be shipped to the packing houses, while houses are well stocked.

Calgary.—While Calvin Collings, Vice-President of the United States, was not included in the trade relations, tariffs or anything of the kind, he arrived here on the Canadian Pacific Railway, he was met at the station by the "sales" of Banff and Lake Louise and of the Canadian Pacific. He was met by the "sales" of Banff and Lake Louise and of the Canadian Pacific. He was met by the "sales" of Banff and Lake Louise and of the Canadian Pacific.

"No wonder you Canadians are proud of your mountains," he asserted; "they are magnificent."

The Vice-President spent some time in conversation with J. M. Cameron, general superintendent of the Alberta Division of the C.P.R.

Montreal.—According to a joint circular issued by the Canadian Pacific Railway and Canadian Pacific Steamships Limited, Mr. Allan Cameron, an appointed Oriental manager, with office at Hong Kong, effective October 1.

It is understood that Mr. Cameron will be in charge of both traffic and operating departments. He will be much greater for the idea is growing rapidly. The railways are having a very busy season.

Winning.—After a careful survey of reports received from C.P.R. agents throughout the West, it is estimated that this year's crop will approximate 317,000 bushels according to the weekly crop reports of the C.P.R. agricultural department issued here.

Reports indicate that the Western crop generally is turning out well. Even areas where poor yields were looked for, the conditions have proved better than anticipated.

ALBERTA

Foremost Farmer Killed; Trying To Stop Bolting Team

Was Thrown Under Wagon—
Wheels Passed Over Head
and Shoulders

Particulars of the death of Nils Anderson, who was killed at Foremost on Sunday last, show that along with William Shoemaker, he was engaged in loading a wagon with oat bundles. Shoemaker was on top of the load and while deceased was on the ground. The load began to slip, throwing shoemaker off and causing him to fall between the horses, who became scared and started to bolt. Anderson jumped for the horses, and was pulled, under the wagon. He died about 45 minutes after. The wheels of the wagon passed over the head and shoulders of the deceased, crushing his jawbone and chest. The coroner, Mr. Sergeant, considered that an inquest was not necessary as it was a clear case of accident with no one to blame. Deceased was a single man with a brother at Pendant D'Oreille.

Employers may purchase for their employees—School Boards for their teachers—Congregations for their Ministers. Cannot be seized or levied upon.

No medical examination required.

Free from Dominion Income Tax.

SECURITY—THE DOMINION OF CANADA

Descriptive booklet may be obtained by applying to the Postmaster or by writing, postage free, to the Superintendent Dominion Government Annuities, Ottawa. When writing, kindly state sex, age and age last birthday.

Railway News

Montreal.—On August 22nd, George H. Ham, the "Big O. A. Man" of the Canadian Pacific, celebrated his seventy-fifth birthday and received congratulations from all over Canada.

Vancouver.—Railways in Canada are in an excellent position to handle the bumper grain crop of the prairie provinces. There are also 10,000 cars in the western division of the C.P.R. ready to handle grain moving westward from the prairie grain fields, officials of the railway state. C. A. Colwell, assistant general superintendent of the C.P.R., general superintendent, stated that heavy shipments will be made to the Orient through this port.

Montreal.—Despite warnings and the efforts of the railways to prevent them, accidents are occurring at railway crossings. If automobile drivers were a little more cautious they would save themselves a great deal of trouble and save their cars from a great deal of damage. Of course there are some cases where it is difficult to avoid accidents, but most accidents that happen are avoidable. Particulars have just come to hand of an occurrence in New Brunswick.

An Overland automobile, License 15717 N. B., owned by T. J. Jones, of Perth Junction, and driven by K. Anderson, also of Perth Junction, ran into C. P. R. train No. 182 at the crossing just north of Anderson Bridge, N.B. The engine had already passed over the Canadian Pacific tracks and struck the side of the tender. Mr. Anderson claimed that he did not see or hear the train in time to stop, although his car was going very slowly. The car was considerably damaged, but happily nobody was hurt.

Quebec.—A record was broken at the Chateau Frontenac recently, the hotel being filled to capacity and not a single room was vacant. Many of the passengers who arrived aboard the steamer, had to remain at the hotel. Tourists from all parts of the States and Canada arrived by motor and the parking ground in front of the Chateau was lined with rows and rows of cars. The lobby was having a very busy season. Tourists anxiously waited for accommodations and in the evening the crowd was greater than ever. The new wing of the Chateau when completed, undoubtedly be a boon to the city as the additional accommodations will satisfy the large demand made on the hotel.

The advent of the August peak tourist traffic occasions in Quebec have taken on a new aspect, which has re-evaluated the importance of the service of the traffic policemen.
